

POTENTIAL HAZARDOUS WASTE SITE

EXECUTIVE SUMMARY *Preliminary Assessment*

Taconic Products, Inc.
Site Name

Needs to be added
Site Inspection
New
EPA Site ID Number

NY Route 22, Millerton, NY
Address

02-8303-48
TDD Number

Date of Site Visit: May 12, 1983

SITE DESCRIPTION

The site is a plant that coats drafting papers. From 1953 until 1963 waste solvents were incinerated in drums behind the plant. According to plant representatives, several drums were dumped into a pit on one occasion and ignited. Since 1966, these wastes have been hauled off-site.

PRIORITY FOR FURTHER ACTION: High Medium ☒ Low

RECOMMENDATIONS

Some organic chemicals may have contaminated groundwater. Sampling of municipal wells is recommended to determine if groundwater is contaminated.

Prepared by: Scott Stanford
of NUS Corporation

Part 2 - Waste Information

Section IV. Hazardous Substances and Section V. Feedstocks

Comments:

The solvents listed in Section IV are carrier solutions for resins, pigments, and plasticizers used to coat drafting papers. The facility uses 119 feedstock chemicals that consist of various coatings dissolved in the solvents listed. Wastes from the plant are the used coating solutions. These solutions cannot be recycled because of changes in concentration caused by evaporation of the carrier solvent during the coating process. 21 waste solutions are containerized in drums and shipped out as hazardous waste.

D. 0.5 (mi)

14 DESCRIPTION OF SITE IN RELATION TO SURROUNDING TOPOGRAPHY

The plant is situated on a valley bottom at the base of a steep 500-foot high hill. Drainage from the site enters nearby Webatuck Creek, which flows south through Millerton.
